- High quality made accessories to complete your sauna enjoyment

*Quality Sauna Heaters
& Accessories from Certikin.*

“the heart of a successful sauna”

SAUNA HEATERS & CONTROL PANELS

In today's fast paced, hectic lifestyle, after a hard day in the office or after a stress filled drive home, relax, soothe away the tension, reduce the aches and pains in a hot Sauna. Feel the heat warming your body reducing muscle tension and all the troubles just float away. Sauna heat is also proven in weight loss and its medical properties for rheumatism, arthritis and muscular pains are widely accepted.

Certikin have all the heaters and accessories that you would need to make your sauna a very special and relaxing place to be, so just sit back and enjoy.

For a successful sauna you need a proven heater; all Certikin sauna heaters are the best, top quality, value for money units you can buy.

Certikin heaters come in two versions, with controls built-in as part of the heater for domestic use only and heaters requiring separate controls mounted outside the sauna usually used commercially but can be used domestically especially useful if the benches come to close to the heater preventing access to the controls.

Sauna Heater - Domestic

Available from 3-8kW, are suitable for rooms up to 13 cubic metres volume, and can be wired single or three phase via a suitable sized RCCB. The controls come fitted on the front face of the stove but can be moved to the left or right hand side without additional parts being required. The deep stone tray allows for good heat output and distribution around the sauna.

(Codes: 3kW SSH30C, 4.5kW SSH45C, 6kW SSH60C & 8kW SSH80C).

Sauna Heaters - Commercial

Available from 6-15kW output these will suit sauna

cabins of 5-24 cubic metres volume. Commercial stoves are 3 phase only and above 8kW output differ from a domestic stove in having an externally mounted control panel outside the cabin. These stoves can be used domestically if the sauna bench layout prevents access to the heater controls, or if the the sauna size requires the higher output stove. (Codes: 6kW SSH60, 8kW SSH80, 10.5kW SSH105, 12kW SSH120, 15kW SSH150).

Note: When ordering, add a control panel to the selected heater.

To prevent unauthorised access to the control panel a lockable cover is available.

SAUNA HEATER SPECIFICATIONS

Part number	Size kW	Phase	Measuring Volume m3	Control panel 1 phase	Control panel 3 phase	Heater Dimensions	Stone Capacity	Usage / Type
SSH30C	3	1 or 3	2-4	built-in	built-in	410 x 620 x 280	15kg	Domestic

SSH80SA	8	3 only	8-13	-	SSP20S	475 x 505 x 360	23kg	Auto Steamy

SAUNA ACCESSORIES

Control Panels

For sauna heaters without built on controls, a control panel is required. All control panels feature a splash proof housing, a heater on indicator light, adjustable electronic thermostat, sauna light switch with indicator and timer function 1 to 8 hour pre-set time and 1 to 4 hour operating time. The three phase control panel has all the features of the single phase and is suitable for commercial, or large domestic applications. Use SSP21T single phase panel on stoves up to 8kW loading and SSP23T on 3 phase stoves up to 10.5kW loading.

SSP33T 3 phase control panel is for use of 10.5kW and up to 15kW loading.

Heater / Wall Guards

The heater / wall guard prevents accidental contact with the hot stove and is available as a 2 or 3 sided guard. The guard can be mounted against one wall or go totally around the stove. For large stoves a floor mounted version is required. (Codes: Wall mounted 2 sided guard SSA019, 3 Sided SSA020, Floor mounted 2 sided guard SSA021 & 3 Sided SSA022).

Sauna Wall & Ceiling Lighting

Certikin offer both wall and ceiling lights which are suitable for all saunas. For the sauna wall light use 240 volt 40W bulb. (Codes: Wall light SSA007W, Ceiling / Wall light SSA007 & 40W bulb SSA007B).

Sauna Door & Frames

Measuring 175cm high x 67cm wide this wooden door comes complete with the frame and is suitable for all saunas. (Code: SSA011).

As an alternative to the wooden door above Certikin can offer a toughened safety glass door complete with frame. It has a magnetic catch and is suitable for both commercial and domestic saunas. (Code: SSA012).

SAUNA ACCESSORIES

Towel Hooks

The Certikin towel hooks are suitable for any sauna and make a great accessory that matches your sauna. (Code: SSA024).

Head Rest

Relax in comfort with the wooden headrests that are designed to give superb support. (Code: SSA009).

Sauna Pails & Ladles

Why not complete your sauna with quality enhancing accessories? Certikin have both wooden and copper pails that would be ideal in any sauna. The wooden pail comes complete with a liner and gives your sauna a rustic feel. The ladles are for applying water onto the heater stones and come in both wood or copper. (Codes: Wooden pail SSA003, Copper pail SSA001, Wooden ladle SSA002 & Copper ladle SSA001).

Sand Timer

Ideal way of timing your sauna bathing session. Lasts approximately 30 minutes. (Code: SSA025).

Sauna Thermometer

This thermometer matches the hygrometer and gives the actual temperature in the sauna. This is a legal requirement and should be fitted in all commercial saunas. (Code: SSA027).

Sauna Hygrometer

The Sauna hygrometer is an attractive wall mounted dial which tells you the humidity inside your sauna cabin. (Code: SSA028).
